SUMMARY

I'm a Back-end developer with a strong focus on building scalable and efficient applications. Skilled in Java, Spring Boot, PostgreSQL, and MongoDB, I specialize in developing high-performance systems, working with APIs, and managing databases. While my main expertise lies in Back-end development, I also have solid Front-end skills, including HTML, CSS, CSS libraries, JavaScript, and React. This allows me to create seamless and well-integrated applications from end to end. I'm passionate about writing clean, maintainable code and continuously improving my skills to build reliable and efficient solutions.

PROJECTS

Telegram Bot for Video Formats　　　　　　　　　　　　　　　　　　Link to Demo

Developed a Telegram bot that allows users to choose video formats and qualities using Java and Telegram API.

E-commerce Website　　　　　　　　　　　　　　　　　　　　　　　Link to Demo

Built a dynamic e-commerce platform with product sorting and image storage functionalities using Java Spring Boot and PostgreSQL.
